Fitting and showing is the art of training, grooming, and showing livestock to make them more presentable in competitive exhibitions.

Judging of a showmanship contest is based on preparation of animals for show, their apparent training, and the appearance and behavior of the participating showmen. Animal confirmation should not be considered except as it may affect the way an animal should be fitted and shown. Fine or technical points should not be over emphasized to the extent that they are given more weight than an effective overall job of presenting a clean animal, nor should minor infractions result in the disqualification of a showman. Basic skills in both grooming and showing should not be confused with current fads and trends.

Following is an outline of desirable showmanship practices and the relative importance of each. The showmanship judge should make placings according to the degree of excellence displayed in carrying out these practices. Exhibitors should use this guide in preparing for showmanship contests. This guide is approved for all 4-H Beef, Sheep, and Swine Showmanship Contests in Nebraska and Iowa.

At most county fairs, showmanship is evaluated by the live animal judge at either the beginning or end of the species show. Showmanship contests at regional shows and most state fairs are conducted with separate judges evaluating exhibitors during the show and making final selections at the end of the show. Exhibitors should become familiar with the premium list for the show so all animals will be groomed and exhibited in a manner consistent with the show rules.

   b. Hide clean and free of dust and dandruff.
   c. Legs and hooves clean.
   d. Halter clean and properly adjusted.

2. Grooming 20

      curled or it may be pulled forward and blocked. Short, stiff hair may be shown
      smooth. In some cases, areas may be brushed smooth, while other areas, such as the

      some deficiency. Short hair may be slick shorn (with the fall of the hair).

   b. Hooves trimmed and shaped so that the animal can stand straight; trimming
      done early enough so the animal’s feet are not sore and so the animal has had time to
      adjust. Trimming to cause excessive straightness is discouraged. Hooves should be
      oiled. The addition of unnatural color or other compounds should be discounted.

   c. Horns (if present) curved, shaped, and polished.

   d. The switch may be left natural, fluffed, ratted, or formed at twist height.

   e. The addition of natural or synthetic hair or hair-like materials should be
      discouraged and severely discounted in a showmanship contest. A complete tail
      switch may be added if desired.

   f. Animals groomed with compounds which rub off color should receive lowest
      possible ribbon placing or disqualification.
3. Clipping  

a. Major clipping done about one week before show.

b. Head clipped on polled or dehorned market calf, never clipped on horned animal but may be trimmed and cleaned up if necessary. Head clipped from ears forward and over top of poll, if desired. Ears or eyelashes never clipped. Hair blended from clipped to unclipped part.
