

# **KNOW Before YOU SHOW**

**A Biosecurity Message from the Indiana State Board of Animal Health**

# **What to know and look for prior to exhibitions**

# New CVI Rules

- In-state exhibitors
  - No CVIs
    - under state rules exhibit organizers may require if they choose
- Out-of-state exhibitors
  - CVI written within 30 days of exhibition

# Why Now?

- Diseases eradicated
  - Pseudorabies, tuberculosis, brucellosis
- New state-of-the-art technology
  - Premise Identification
  - Mapping

# What Is Biosecurity?

Bio=Life

Security=Protect

Examples: Washing Your Hands

# Biosecurity During a Show

- Disinfect all equipment
- Don't share equipment
- Cover unused equipment and feed
- Disinfect truck and trailer
- Properly dispose of unused bedding
- Change shoes and clothes

# Biosecurity After the Show

- Isolate and observe animals
  - Away from pets and livestock
- Clean, Clean, Clean
  - Equipment, vehicles and boots/clothing
- Disinfect, Disinfect, Disinfect

# Foot Rot

- Highly contagious
- Lameness
- Foul odor
- Often confused with:

– Foot abscesses,  
foot scald, laminitis,  
founder and injuries

# Ringworm

- Fungal disease
- All animal susceptible
- Patchy areas of skin irritation
  - Round lesions
  - Oozing or redness
- No topical cure

# Caseous Lymphadenitis

- Enlargement of lymph nodes
- Abscesses around major organs
- Weight loss
- Pneumonia
- Neurological signs

# Mange

- Caused by mites
- Severe itching and rubbing
- Spread by direct contact among animals
- External treatments are available

# Orf

- Caused by poxvirus
- Crusty lesions
  - Lips, mouth, nostrils, eyelids, face, vulva, teats, udders and feet
- Can be passed to humans
- Vaccine available

# Warts

- Spread by
  - Direct contact, insects and other carriers
- Small cauliflower-shaped growths
- May be removed surgically

# Be Prepared
